

Joaquin Leimeter

FULL STACK DEVELOPER

Profile

I'm a full stack developer with a solid foundation across front and back ends. Across teams and roles I've worked through every stage of the product lifecycle — discovery, design, implementation, release. I'm currently leading front-end work and AI-adoption practices on AlixPartners' internal platform team, while building agent-based workflows for my employer, Radium Rocket.

Employment History

Ful stack developer, Alix Partners

MARCH 2025 - PRESENT

Building internal platform applications for consultants in Vue, TypeScript, and Pinia, with occasional .NET back-end work. Leading the team's effort to adopt AI effectively in day-to-day development.

Data Reporting Developer, PwC

OCTOBER 2024 - DECEMBER 2024

Wrote SQL queries and surfaced business data through tables and visualizations within an SAP UI5 reporting environment.

Full Stack Developer, Paytient

APRIL 2024 - SEPTEMBER 2024

Shipped full-stack features on a React and Next.js healthcare payments product, including Java back-end fixes and Mockito unit tests.

Tech Lead — Internal Projects, Radium Rocket

JANUARY 2022 - MARCH 2023

Led a cross-functional team of six consolidating two employee-management apps into one. Also began building agent-based workflows for Radium Rocket to improve how the company uses AI in delivery.

Technical Consultant, Instaseat

SEPTEMBER 2021 - JANUARY 2022

Technical consultant during the discovery phase of a mobile restaurant-waitlist app — shaping scope, documenting requirements, and contributing to product decisions.

Front-End Developer, Brookfield Residential

FEBRUARY 2020 - SEPTEMBER 2021

Co-led the Vue 2 → Vue 3 and Vuex → Pinia migrations across a monorepo, and built a URL-driven property filter system synced to a Mapbox GL map view.

Education

Become a Software developer course at Radium Rocket

JULY 2021 - JANUARY 2022

Electronic Engineering

JANUARY 2017 - DECEMBER 2020

Sound Technician at CETEAR

MARCH 2015 - DECEMBER 2017

Natural Sciences Bachelor at Instituto Fisherton de Educación Integral

2015

Technologies

Front-end: development of modern web applications with React, Vue, and Astro.

Mobile: React Native and Flutter.

UI/UX implementation: strong command of CSS, Tailwind, and CSS Modules, with experience translating Figma designs into functional interfaces and collaborating with design teams.

Back-end: experience building APIs and services with Node.js, Express, and NestJS.

AI-assisted development: use of AI tools to accelerate prototyping, debugging, implementation, and technical exploration.
